Ideation Phase
Brainstorm & Idea Prioritization Template

Date	4 October 2026
Team ID	----------
Project Name	Car Rental Request Automation in ServiceNow Using Service Catalog and Workflows
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Item	Details
Team / Mode	Individual project (ServiceNow Smart Internz). Brainstorming done as an individual session, with the roles of requester, approver and fleet admin considered.
Problem statement selected	How might we let employees raise a car rental request in one place and have approval, car allocation and notifications handled automatically, with no manual follow-up?
Linked problem statements	PS-1 (Employee), PS-2 (Manager / Approver), PS-3 (Fleet Administrator)
Ground rules	Defer judgment • go for quantity • build on ideas • stay focused on the problem • one conversation at a time
Platform scope	ServiceNow Service Catalog, Flow Designer, approvals, business rules, client scripts, e-mail notifications

Step-2: Brainstorm, Idea Listing and Grouping

All ideas were listed freely, then grouped by theme.

A. Catalog Item & Form	B. Workflow & Approvals	C. Notifications
• Car rental request catalog item • Variables: pick-up/drop-off date & time • Pick-up and drop-off location • Car type / preference, passengers • Purpose of travel, cost center • Mandatory field validation	• Flow Designer flow triggered on request • Manager approval step • Auto-reject / escalate if not approved in time • Approval reminder notifications • Conditional approval for premium cars • Parallel approval by cost-center owner	• E-mail on request submission • E-mail on approval / rejection • E-mail on car allocation • Reminder before pick-up date • Return-date reminder • Notification to fleet admin
D. Fleet & Allocation	**E. Scripts & Automation**	**F. Reporting & Experience**
• Fleet catalog table with cars & status • Auto-check car availability • Fulfillment task for fleet team • Record allocated car and driver details • Prevent double bookings • Vendor / rental agency integration	• Client script: return date after pick-up date • Client script: hide/show fields by car type • Business rule: set priority & validate dates • UI policy for mandatory fields • Batch update of request records • Auto-close completed requests	• Dashboard of requests by status • Report on car utilization & cost • Service Portal request tracker • Mobile-friendly form • SLA for approval and allocation • Audit trail for every request

Step-3: Idea Prioritization

Each idea was scored 1–5 for Impact (value to users and organization) and Feasibility (ease of building in ServiceNow). Priority = Impact × Feasibility.

Idea	Impact	Feasibility	Score	Priority
Car rental Service Catalog item with mandatory variables	5	5	25	High – build first (MVP)
Flow Designer flow with manager approval	5	5	25	High – build first (MVP)
E-mail notifications at key stages	4	5	20	High – build first (MVP)
Client script / UI policy and business rule validations	4	5	20	High – build first (MVP)
Fleet table and fulfillment task for car allocation	4	4	16	Medium – build next
Approval reminders and escalation	3	4	12	Medium – build next
Reports and dashboard	3	4	12	Medium – build next

Idea	Impact	Feasibility	Score	Priority
Vendor / rental agency integration	4	2	8	Low – future scope

Impact vs. Feasibility Matrix

HIGH IMPACT / HIGH FEASIBILITY – Do first • Catalog item • Manager approval flow • E-mail notifications • Validation scripts	**HIGH IMPACT / LOWER FEASIBILITY – Plan** • Vendor / agency integration
LOWER IMPACT / HIGH FEASIBILITY – Quick wins • Reminders and escalation • Dashboard and reports • Fleet table & allocation task	**LOWER IMPACT / LOWER FEASIBILITY – Park** • Mobile app customization • Advanced cost analytics

Final Selection for Implementation:

- Epic 1 – Environment setup (instance, roles, update set)
- Epic 2 – Service Catalog item for car rental requests
- Epic 3 – Flow Designer workflow: approval, car allocation, fulfillment
- Epic 4 – Business rules and client scripts for validation
- Epic 5 – Approvals and e-mail notifications
- Epic 6 – Testing, batch updates and documentation
